

## **OPERATIONAL ANALYSIS OF WEEKLY INFORMATION ON COMMUNICABLE DISEASES IN BULGARIA**

### **Week 13 (24.03.2025 – 30.03.2025)**

#### **1. Salmonellosis**

The number of reported cases of Salmonellosis during week 13 of 2025 is 11. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 132. For the same period of the previous year the number of reported cases is 93. The deviation from the previous year is (39).

#### **2. Lyme disease**

The number of reported cases of Lyme disease during week 13 of 2025 is 6. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 45. For the same period of the previous year the number of reported cases is 22. The deviation from the previous year is (23).

#### **3. Gastroenteritis, enterocolitis**

The number of reported cases of Gastroenteritis, enterocolitis during week 13 of 2025 is 168. The deviation from the previous week is (9).

The reported cases are classified as: 80 possible, 80 probable and 8 confirmed.

From the beginning of the year the number of reported cases is 1815. For the same period of the previous year the number of reported cases is 1608. The deviation from the previous year is (207).

#### **4. E. coli infection – escherichiosis (E.coli)**

The number of reported cases of E. coli infection – escherichiosis (E.coli) during week 13 of 2025 is 2. The deviation from the previous week is (-4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 62. For the same period of the previous year the number of reported cases is 62. The deviation from the previous year is (0).

#### **5. Scarlet fever**

The number of reported cases of Scarlet fever during week 13 of 2025 is 133. The deviation from the previous week is (39).

The reported cases are classified as: 39 possible, 71 probable and 23 confirmed.

From the beginning of the year the number of reported cases is 1351. For the same period of the previous year the number of reported cases is 3791. The deviation from the previous year is (-2440).

#### **6. Varicella**

The number of reported cases of Varicella during week 13 of 2025 is 631. The deviation from the previous week is (-20).

The reported cases are classified as: 81 possible, 491 probable and 59 confirmed.

From the beginning of the year the number of reported cases is 8368. For the same period of the previous year the number of reported cases is 10327. The deviation from the previous year is (-1959).

**7. Shigellosis**

The number of reported cases of Shigellosis during week 13 of 2025 is 2. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-4).

**8. Mumps**

The number of reported mumps cases during week No 13 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 5. The deviation from the previous year is (-5).

**9. Pertussis**

The number of reported cases of Pertussis during week 13 of 2025 is 5. The deviation from the previous week is (1).

The reported cases are classified as: 1 possible and 4 confirmed.

From the beginning of the year the number of reported cases is 45. For the same period of the previous year the number of reported cases is 102. The deviation from the previous year is (-57).

**10. Leptospirosis**

The number of reported cases of Leptospirosis during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**11. Botulism**

The number of reported cases of Botulism during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**12. Yersiniosis**

The number of reported cases of Yersiniosis during week 13 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (-2).

**13. Campylobacteriosis**

The number of reported cases of Campylobacteriosis during week 13 of 2025 is 6. The deviation from the previous week is (4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 51. For the same period of the previous year the number of reported cases is 60. The deviation from the previous year is (-9).

**14. Typhoid fever**

The number of reported cases of Typhoid fever during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**15. Legionnaires` disease**

The number of reported cases of Legionnaires` disease during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

**16. Rubella**

The number of reported rubella cases during week No 13 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**17. Congenital rubella**

The number of reported cases of Congenital rubella during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**18. Viral meningitis and meningoencephalitis**

The number of reported cases of Viral meningitis and meningoencephalitis during week 13 of 2025 is 2. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 24. For the same period of the previous year the number of reported cases is 22. The deviation from the previous year is (2).

**19. Crimean-Congo haemorrhagic fever**

The number of reported cases of Crimean-Congo haemorrhagic fever during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**20. Mediterranean spotted fever (Boutonneuse fever)**

The number of reported cases of Mediterranean spotted fever (Boutonneuse fever) during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**21. Meningococcal infection**

The number of reported cases of Meningococcal infection during week 13 of 2025 is 3. The deviation from the previous week is (2).

The reported cases are classified as: 1 possible and 2 confirmed.

From the beginning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (7).

**22. Listeriosis**

The number of reported cases of Listeriosis during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (-2).

**23. Brucellosis**

The number of reported cases of Brucellosis during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (4).

**24. Tularemia**

The number of reported cases of Tularemia during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**25. Acute viral hepatitis ABCDEN**

The number of reported cases of Acute viral hepatitis ABCDEN during week 13 of 2025 is 41. The deviation from the previous week is (9).

The reported cases are classified as: 1 possible, 4 probable and 36 confirmed.

From the beginning of the year the number of reported cases is 286. For the same period of the previous year the number of reported cases is 160. The deviation from the previous year is (126).

**26. Hemorrhagic fever with renal syndrome**

The number of reported cases of Hemorrhagic fever with renal syndrome during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

**27. Q fever**

The number of reported cases of Q fever during week 13 of 2025 is 2. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 12. For the same period of the previous year the number of reported cases is 9. The deviation from the previous year is (3).

**28. Ornithosis**

The number of reported cases of Ornithosis during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**29. Tetanus**

The number of reported cases of Tetanus during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**30. Anthrax**

The number of reported cases of Anthrax during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**31. *Pneumococcal meningitis***

The number of reported cases of Pneumococcal meningitis during week 13 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 8. For the same period of the previous year the number of reported cases is 9. The deviation from the previous year is (-1).

**32. *Streptococcal meningitis***

The number of reported cases of Streptococcal meningitis during week 13 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

**33. *Haemophilus influenzae meningitis***

The number of reported cases of Haemophilus influenzae meningitis during week 13 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

**34. *Bacterial meningitis (other bacteria)***

The number of reported cases of Bacterial meningitis (other bacteria) during week 13 of 2025 is 2. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 17. For the same period of the previous year the number of reported cases is 14. The deviation from the previous year is (3).

**35. *Rotavirus gastroenteritis***

The number of reported cases of Rotavirus gastroenteritis during week 13 of 2025 is 23. The deviation from the previous week is (6).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 267. For the same period of the previous year the number of reported cases is 101. The deviation from the previous year is (166).

**36. *Measles***

The number of reported measles cases during week No 13 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

**37. *SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)***

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

**38. *West Nile virus***

The number of reported cases of West Nile virus during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**39. Tick-borne Encephalitis**

The number of reported cases of Tick-borne Encephalitis during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**40. Pneumococcal invasive disease**

The number of reported cases of Pneumococcal invasive disease during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**41. Variant of Creutzfeldt-Jakob**

The number of reported cases of Variant of Creutzfeldt-Jakob during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**42. COVID-19**

The number of reported cases of COVID-19 during week 13 of 2025 is 10. The deviation from the previous week is (5).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 258. For the same period of the previous year the number of reported cases is 5406. The deviation from the previous year is (-5148).

**43. Lyme neuroborreliosis**

The number of reported cases of Lyme neuroborreliosis during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**44. Monkeypox**

The number of reported cases of Monkeypox during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

**45. Denga**

The number of reported cases of Denga during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 2. The deviation from the previous year is (0).

**46. Cholera**

The number of reported cases of Cholera during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

**47. HIV**

The number of reported cases of HIV during week 13 of 2025 is 8. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 78. For the same period of the previous year the number of reported cases is 54. The deviation from the previous year is (24).

#### **48. Gonorrhea**

The number of reported cases of Gonorrhea during week 13 of 2025 is 2. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 18. For the same period of the previous year the number of reported cases is 21. The deviation from the previous year is (-3).

#### **49. Chlamydial Infection**

The number of reported cases of Chlamydial Infection during week 13 of 2025 is 3. The deviation from the previous week is (-3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 38. For the same period of the previous year the number of reported cases is 23. The deviation from the previous year is (15).

#### **50. Syphilis**

The number of reported cases of Syphilis during week 13 of 2025 is 8. The deviation from the previous week is (1).

The reported cases are classified as: 1 probable and 7 confirmed.

From the beginning of the year the number of reported cases is 103. For the same period of the previous year the number of reported cases is 102. The deviation from the previous year is (1).

#### **51. Congenital Syphilis**

The number of reported cases of Congenital Syphilis during week 13 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 9. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (5).

Регистрирани случаи на Колиентерити (ешерихиози) по седмици в Република България  
 Reported number of cases of E. coli infection – escherichiosis (E.coli) by weeks in Bulgaria

Регистрирани случаи на COVID-19 по седмици в Република България  
 Reported number of cases of COVID-19 by weeks in Bulgaria

Регистрирани случаи на Дизентерия (шигелоза) по седмици в Република България  
 Reported number of cases of Shigellosis by weeks in Bulgaria

Регистрирани случаи на Гастроентерит, ентероколит по седмици в Република България  
 Reported number of cases of Gastroenteritis, enterocolitis by weeks in Bulgaria

Регистрирани случаи на Остър вирусен хепатит ABCDE по седмици в Република България  
 Reported number of cases of Acute viral hepatitis ABCDEN by weeks in Bulgaria

Регистрирани случаи на HIV по седмици в Република България  
 Reported number of cases of HIV by weeks in Bulgaria

Регистрирани случаи на Лаймска борелиоза по седмици в Република България  
Reported number of cases of Lyme disease by weeks in Bulgaria

Регистрирани случаи на Коклюш по седмици в Република България  
Reported number of cases of Pertussis by weeks in Bulgaria

Регистрирани случаи на Салмонелоза по седмици в Република България  
Reported number of cases of Salmonellosis by weeks in Bulgaria

Регистрирани случаи на Скарлатина по седмици в Република България  
Reported number of cases of Scarlet fever by weeks in Bulgaria

Регистрирани случаи на Варицела по седмици в Република България  
Reported number of cases of Varicella by weeks in Bulgaria

Регистрирани случаи на Вирусни менингити и менингоенцефалити по седмици в Република България  
Reported number of cases of Viral meningitis and meningoencephalitis by weeks in Bulgaria
