The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 143. For the same period of the previous year the number of reported cases is 101. The deviation from the previous year is (42).

2. Lyme disease

The number of reported cases of Lyme disease during week 14 of 2025 is 6. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 51. For the same period of the previous year the number of reported cases is 25. The deviation from the previous year is (26).

3. Gastroenteritis, enterocolitis

The number of reported cases of Gastroenteritis, enterocolitis during week 14 of 2025 is 165. The deviation from the previous week is (-3).

The reported cases are classified as: 79 possible, 78 probable and 8 confirmed.

From the beginning of the year the number of reported cases is 1980. For the same period of the previous year the number of reported cases is 1747. The deviation from the previous year is (233).

Регистрирани случаи на Гастроентерит, ентероколит по седмици в Република България
Reported number of cases of Gastroenteritis, enterocolitis by weeks in Bulgaria

4. E. coli infection – escherichiosis (E.coli)

The number of reported cases of E. coli infection – escherichiosis (E.coli) during week 14 of 2025 is 3. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 65. For the same period of the previous year the number of reported cases is 64. The deviation from the previous year is (1).

Регистрирани случаи на Колиентерити (ешерихиози) по седмици в Република България
Reported number of cases of E. coli infection – escherichiosis (E.coli) by weeks in Bulgaria

5. Scarlet fever

The number of reported cases of Scarlet fever during week 14 of 2025 is 80. The deviation from the previous week is (-53).

The reported cases are classified as: 19 possible, 38 probable and 23 confirmed.

From the beginning of the year the number of reported cases is 1431. For the same period of the previous year the number of reported cases is 4116. The deviation from the previous year is (-2685).

6. Varicella

The number of reported cases of Varicella during week 14 of 2025 is 539. The deviation from the previous week is (-92).

The reported cases are classified as: 52 possible, 439 probable and 48 confirmed.

From the beginning of the year the number of reported cases is 8907. For the same period of the previous year the number of reported cases is 11083. The deviation from the previous year is (-2176).

7. Shigellosis

The number of reported cases of Shigellosis during week 14 of 2025 is 2. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 6. For the same period of the previous year the number of reported cases is 9. The deviation from the previous year is (-3).

8. Mumps

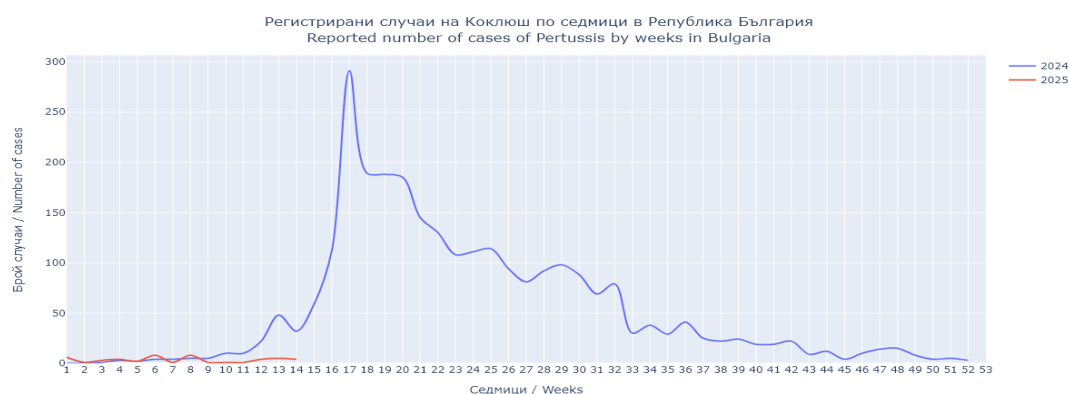

The number of reported mumps cases during week No 14 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-8).

9. Pertussis

The number of reported cases of Pertussis during week 14 of 2025 is 4. The deviation from the previous week is (-1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 45. For the same period of the previous year the number of reported cases is 139. The deviation from the previous year is (-94).

10. Leptospirosis

The number of reported cases of Leptospirosis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

11. Botulism

The number of reported cases of Botulism during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

12. Yersiniosis

The number of reported cases of Yersiniosis during week 14 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 7. The deviation from the previous year is (-3).

13. Campylobacteriosis

The number of reported cases of Campylobacteriosis during week 14 of 2025 is 3. The deviation from the previous week is (-3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 54. For the same period of the previous year the number of reported cases is 64. The deviation from the previous year is (-10).

14. Typhoid fever

The number of reported cases of Typhoid fever during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

15. Legionnaires` disease

The number of reported cases of Legionnaires` disease during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

16. Rubella

The number of reported rubella cases during week No 14 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

17. Congenital rubella

The number of reported cases of Congenital rubella during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

18. Viral meningitis and meningoencephalitis

The number of reported cases of Viral meningitis and meningoencephalitis during week 14 of 2025 is 2. The deviation from the previous week is (0).

The reported cases are classified as 1 probable and 1 confirmed.

From the beginning of the year the number of reported cases is 26. For the same period of the previous year the number of reported cases is 23. The deviation from the previous year is (3).

**19. Crimean-Congo haemorrhagic fever**

The number of reported cases of Crimean-Congo haemorrhagic fever during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

20. Mediterranean spotted fever (Boutonneuse fever)

The number of reported cases of Mediterranean spotted fever (Boutonneuse fever) during week 14 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

21. Meningococcal infection

The number of reported cases of Meningococcal infection during week 14 of 2025 is 0. The deviation from the previous week is (-3). From the beginning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (7).

22. Listeriosis

The number of reported cases of Listeriosis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 4. The deviation from the previous year is (-2).

23. Brucellosis

The number of reported cases of Brucellosis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (4).

24. Tularaemia

The number of reported cases of Tularaemia during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

25. Acute viral hepatitis ABCDEN

The number of reported cases of Acute viral hepatitis ABCDEN during week 14 of 2025 is 28. The deviation from the previous week is (-13).

The reported cases are classified as: 1 possible, 3 probable and 24 confirmed.

From the beginning of the year the number of reported cases is 314. For the same period of the previous year the number of reported cases is 173. The deviation from the previous year is (141).

26. Hemorrhagic fever with renal syndrome

The number of reported cases of Hemorrhagic fever with renal syndrome during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

27. Q fever

The number of reported cases of Q fever during week 14 of 2025 is 2. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 14. For the same period of the previous year the number of reported cases is 9. The deviation from the previous year is (5).

28. Ornithosis

The number of reported cases of Ornithosis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

29. Tetanus

The number of reported cases of Tetanus during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

30. Anthrax

The number of reported cases of Anthrax during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

31. Pneumococcal meningitis

The number of reported cases of Pneumococcal meningitis during week 14 of 2025 is 2. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 9. The deviation from the previous year is (1).

32. Streptococcal meningitis

The number of reported cases of Streptococcal meningitis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

33. Haemophilus influenzae meningitis

The number of reported cases of Haemophilus influenzae meningitis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

34. Bacterial meningitis (other bacteria)

The number of reported cases of Bacterial meningitis (other bacteria) during week 14 of 2025 is 3. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 20. For the same period of the previous year the number of reported cases is 15. The deviation from the previous year is (5).

35. Rotavirus gastroenteritis

The number of reported cases of Rotavirus gastroenteritis during week 14 of 2025 is 13. The deviation from the previous week is (-10).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 280. For the same period of the previous year the number of reported cases is 117. The deviation from the previous year is (163).

36. Measles

The number of reported measles cases during week No 14 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (0).

37. SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

38. West Nile virus

The number of reported cases of West Nile virus during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

39. Tick-borne Encephalitis

The number of reported cases of Tick-borne Encephalitis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

40. Pneumococcal invasive disease

The number of reported cases of Pneumococcal invasive disease during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

41. Variant of Creutzfeldt-Jakob

The number of reported cases of Variant of Creutzfeldt-Jakob during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

42. COVID-19

The number of reported cases of COVID-19 during week 14 of 2025 is 7. The deviation from the previous week is (-3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 265. For the same period of the previous year the number of reported cases is 5444. The deviation from the previous year is (-5179).

43. Lyme neuroborreliosis

The number of reported cases of Lyme neuroborreliosis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

44. Monkeypox

The number of reported cases of Monkeypox during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

45. Denga

The number of reported cases of Denga during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

46. Cholera

The number of reported cases of Cholera during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

47. HIV

The number of reported cases of HIV during week 14 of 2025 is 5. The deviation from the previous week is (-3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 83. For the same period of the previous year the number of reported cases is 63. The deviation from the previous year is (20).

48. Gonorrhoea

The number of reported cases of Gonorrhoea during week 14 of 2025 is 1. The deviation from the previous week is (-1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 19. For the same period of the previous year the number of reported cases is 24. The deviation from the previous year is (-5).

49. Chlamydial Infection

The number of reported cases of Chlamydial Infection during week 14 of 2025 is 5. The deviation from the previous week is (2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 43. For the same period of the previous year the number of reported cases is 24. The deviation from the previous year is (19).

50. Syphilis

The number of reported cases of Syphilis during week 14 of 2025 is 8. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 111. For the same period of the previous year the number of reported cases is 110. The deviation from the previous year is (1).

51. Congenital Syphilis

The number of reported cases of Congenital Syphilis during week 14 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 9. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (3).
