The number of reported cases of Scarlet fever during week 16 of 2025 is 114. The deviation from the previous week is (33).

The reported cases are classified as: 30 possible, 60 probable and 24 confirmed.

From the beginning of the year the number of reported cases is 1626. For the same period of the previous year the number of reported cases is 4699. The deviation from the previous year is (-3073).

Регистрирани случаи на Скарлатина по седмици в Република България
Reported number of cases of Scarlet fever by weeks in Bulgaria

6. Varicella

The number of reported cases of Varicella during week 16 of 2025 is 414. The deviation from the previous week is (-243).

The reported cases are classified as: 39 possible, 331 probable and 44 confirmed.

From the beginning of the year the number of reported cases is 9978. For the same period of the previous year the number of reported cases is 12673. The deviation from the previous year is (-2695).

Регистрирани случаи на Варицела по седмици в Република България
Reported number of cases of Varicella by weeks in Bulgaria

7. Shigellosis

The number of reported cases of Shigellosis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 6. For the same period of the previous year the number of reported cases is 10. The deviation from the previous year is (-4).

Регистрирани случаи на Дизентерия (шигелоза) по седмици в Република България
Reported number of cases of Shigellosis by weeks in Bulgaria

8. Mumps

The number of reported mumps cases during week No 16 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 8. The deviation from the previous year is (-8).

9. Pertussis

The number of reported cases of Pertussis during week 16 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 46. For the same period of the previous year the number of reported cases is 295. The deviation from the previous year is (-249).

10. Leptospirosis

The number of reported cases of Leptospirosis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

11. Botulism

The number of reported cases of Botulism during week 16 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (1).

12. Yersiniosis

The number of reported cases of Yersiniosis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 7. The deviation from the previous year is (-3).

13. Campylobacteriosis

The number of reported cases of Campylobacteriosis during week 16 of 2025 is 2. The deviation from the previous week is (-2).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 60. For the same period of the previous year the number of reported cases is 73. The deviation from the previous year is (-13).

14. Typhoid fever

The number of reported cases of Typhoid fever during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

15. Legionnaires` disease

The number of reported cases of Legionnaires` disease during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

16. Rubella

The number of reported rubella cases during week No 16 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

17. Congenital rubella

The number of reported cases of Congenital rubella during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

18. Viral meningitis and meningoencephalitis

The number of reported cases of Viral meningitis and meningoencephalitis during week 16 of 2025 is 3. The deviation from the previous week is (2).

The reported cases are classified as: 1 probable and 2 confirmed.

From the beginning of the year the number of reported cases is 30. For the same period of the previous year the number of reported cases is 26. The deviation from the previous year is (4).

Регистрирани случаи на Вирусни менингити и менингоенцефалити по седмици в Република България
Reported number of cases of Viral meningitis and meningoencephalitis by weeks in Bulgaria

19. Crimean-Congo haemorrhagic fever

The number of reported cases of Crimean-Congo haemorrhagic fever during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

20. Mediterranean spotted fever (Boutonneuse fever)

The number of reported cases of Mediterranean spotted fever (Boutonneuse fever) during week 16 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 2. The deviation from the previous year is (0).

21. Meningococcal infection

The number of reported cases of Meningococcal infection during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 10. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (7).

22. *Listeriosis*

The number of reported cases of Listeriosis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 5. The deviation from the previous year is (-3).

23. *Brucellosis*

The number of reported cases of Brucellosis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 4. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (4).

24. *Tularaemia*

The number of reported cases of Tularaemia during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

25. *Acute viral hepatitis ABCDEN*

The number of reported cases of Acute viral hepatitis ABCDEN during week 16 of 2025 is 28. The deviation from the previous week is (7).

The reported cases are classified as: 4 probable and 24 confirmed.

From the beginning of the year the number of reported cases is 363. For the same period of the previous year the number of reported cases is 197. The deviation from the previous year is (166).

26. *Hemorrhagic fever with renal syndrome*

The number of reported cases of Hemorrhagic fever with renal syndrome during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (-1).

27. *Q fever*

The number of reported cases of Q fever during week 16 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 15. For the same period of the previous year the number of reported cases is 11. The deviation from the previous year is (4).

28. Ornithosis

The number of reported cases of Ornithosis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

29. Tetanus

The number of reported cases of Tetanus during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

30. Anthrax

The number of reported cases of Anthrax during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

31. Pneumococcal meningitis

The number of reported cases of Pneumococcal meningitis during week 16 of 2025 is 0. The deviation from the previous week is (-1). From the beginning of the year the number of reported cases is 11. For the same period of the previous year the number of reported cases is 10. The deviation from the previous year is (1).

32. Streptococcal meningitis

The number of reported cases of Streptococcal meningitis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

33. Haemophilus influenzae meningitis

The number of reported cases of Haemophilus influenzae meningitis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (1).

34. Bacterial meningitis (other bacteria)

The number of reported cases of Bacterial meningitis (other bacteria) during week 16 of 2025 is 2. The deviation from the previous week is (2).

The reported cases are classified as 1 probable and 1 confirmed.

From the beginning of the year the number of reported cases is 22. For the same period of the previous year the number of reported cases is 19. The deviation from the previous year is (3).

35. Rotavirus gastroenteritis

The number of reported cases of Rotavirus gastroenteritis during week 16 of 2025 is 12. The deviation from the previous week is (-3).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 307. For the same period of the previous year the number of reported cases is 133. The deviation from the previous year is (174).

36. Measles

The number of reported measles cases during week No 16 of year 2025 is 0. The deviation from the previous week is (0). From the beginning of year the number of reported cases is 1. For the same period of the previous year the number of reported cases is 1. The deviation from the previous year is (0).

37. SHIGA/VERO toxin producing E. coli infection (STEC/VTEC)

The number of reported cases of SHIGA/VERO toxin producing E. coli infection (STEC/VTEC) during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

38. West Nile virus

The number of reported cases of West Nile virus during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

39. Tick-borne Encephalitis

The number of reported cases of Tick-borne Encephalitis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

40. Pneumococcal invasive disease

The number of reported cases of Pneumococcal invasive disease during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

41. Variant of Creutzfeldt-Jakob

The number of reported cases of Variant of Creutzfeldt-Jakob during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

42. COVID-19

The number of reported cases of COVID-19 during week 16 of 2025 is 2. The deviation from the previous week is (-4).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 273. For the same period of the previous year the number of reported cases is 5523. The deviation from the previous year is (-5250).

Регистрирани случаи на COVID-19 по седмици в Република България
Reported number of cases of COVID-19 by weeks in Bulgaria

43. Lyme neuroborreliosis

The number of reported cases of Lyme neuroborreliosis during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

44. Monkeypox

The number of reported cases of Monkeypox during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (2).

45. Denga

The number of reported cases of Denga during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 2. For the same period of the previous year the number of reported cases is 3. The deviation from the previous year is (-1).

46. Cholera

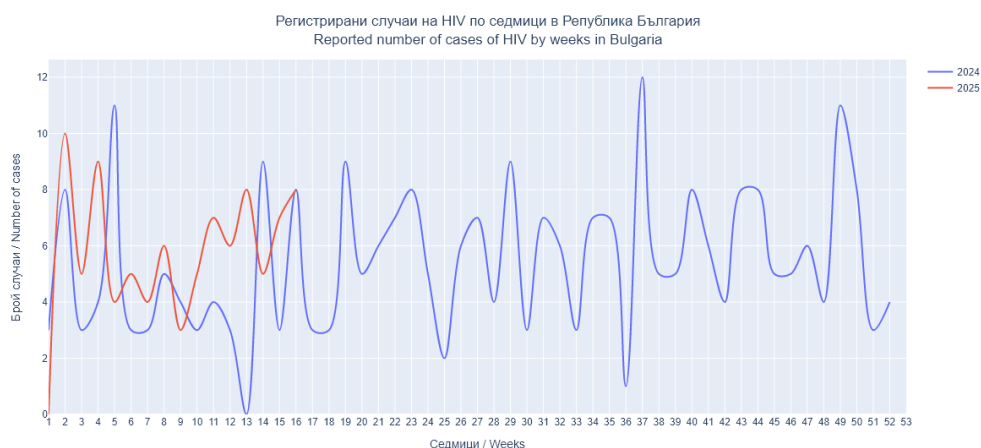

The number of reported cases of Cholera during week 16 of 2025 is 0. The deviation from the previous week is (0). From the beginning of the year the number of reported cases is 0. For the same period of the previous year the number of reported cases is 0. The deviation from the previous year is (0).

47. HIV

The number of reported cases of HIV during week 16 of 2025 is 8. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 98. For the same period of the previous year the number of reported cases is 74. The deviation from the previous year is (24).

48. *Gonorrhea*

The number of reported cases of Gonorrhea during week 16 of 2025 is 3. The deviation from the previous week is (0).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 25. For the same period of the previous year the number of reported cases is 26. The deviation from the previous year is (-1).

49. *Chlamydial Infection*

The number of reported cases of Chlamydial Infection during week 16 of 2025 is 1. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 44. For the same period of the previous year the number of reported cases is 27. The deviation from the previous year is (17).

50. *Syphilis*

The number of reported cases of Syphilis during week 16 of 2025 is 5. The deviation from the previous week is (1).

The reported cases are classified as confirmed.

From the beginning of the year the number of reported cases is 120. For the same period of the previous year the number of reported cases is 126. The deviation from the previous year is (-6).

51. *Congenital Syphilis*

The number of reported cases of Congenital Syphilis during week 16 of 2025 is 1. The deviation from the previous week is (0).

The reported cases are classified as probable.

From the beginning of the year the number of reported cases is 11. For the same period of the previous year the number of reported cases is 6. The deviation from the previous year is (5).
