Diagnostic tests and services

NRL Immunology

code	Test/service	Price in Eur	Delivery of result (working days)
105	Medical examination and consultation	15,34	1
502	Quantitative determination of serum (plasma) immunoglobulins (IgG, IgM, IgA), for each	6,14	4
503	Immunophenotyping of blood cells by flow cytometry (%)	39,37	3
504	Immunophenotyping of blood cells by flow cytometry (% and absolute count)	42,44	3
505	Immunophenotyping of chronic lympho proliferations	93,06	3
506	IGRA tests for diagnosis of tuberculosis infection (Quantiferon)	61,36	5
507	IGRA tests for diagnosis of tuberculosis infection (T-Spot TB)	61,36	3
508	Quantitative cytokine analysis ELISA (for each cytokine)	28,12	5
511	Leukocyte activation by flow cytometry	35,28	3
512	Antigen-specific T – lymphocytes by flow cytometry	50,11	3 to 5
513	Quantitative flow cytometry analysis of cytokine profile, for 6 cytokines	51,13	5
514	Quantitation of complement components – C3, C4, for each	6,14	3
517	Flow cytometry test for basophile degranulation	32,72	5
521	Determination of CMV- specific T cell response	66,47	5
522	T-cell functional activity by spontaneous and mitogen-induced production of IFN-gamma	51,13	3
